

Falcon Oil & Gas Ltd - Hungary Well Test Begins

Dublin, 3rd March 2014 - Falcon Oil & Gas Ltd. (TSXV: FO, AIM: FOG, ESM: FAC) ("Falcon" or the "Company") is pleased to announce that well testing operations on the Kút völgy-1 well in Hungary have started.

Kút völgy-1 is the first of a three well drilling and testing programme fully funded by **NAFTNA INDUSTRIJA SRBIJE JSC ("NIS")**, to evaluate the gas potential of the Algyő Formation in Falcon's Mako trough permit.

The testing objectives are to determine reservoir quality and gas productivity from the target Algyő formation encountered in Kutvolgy -1. Testing operations are anticipated to take 3 months.

Philip O'Quigley, CEO of Falcon commented:

"We are pleased to confirm that well testing operations on our Kút völgy-1 well have commenced. Technical evaluation of the well results obtained so far indicate possible gas pay zones in the Algyő formation that will be tested in the coming weeks."

About the Algyő

The Algyő is a relatively shallow play between 2,300m and 3,500m. A number of Falcon wells have been drilled through the Algyő in recent years, some of which encountered gas shows, but to date no well has ever tested the play concept at an optimal location as previous wells targeted deeper intervals of up to 6,000m.

Multiple Algyő prospects have subsequently been identified by Falcon through extensive AVO analysis. The ongoing exploration drilling program with NIS is targeting three separate high-graded prospects.

An independent study by RPS Energy published in January 2013 included for the first time Prospective Resource recoverable volumes attributable to the shallow Algyő Play. According to the RPS report, eight of the ten prospects identified by Falcon contain 568 BCF of prospective recoverable gas resources, each with a 10% Geological Probability of Success (“GPOS”).

About Falcon Oil & Gas Ltd.

Falcon is an international oil & gas company engaged in the acquisition, exploration and development of conventional and unconventional oil and gas assets, with the current portfolio spread between Australia, South Africa and Hungary. Falcon is incorporated in British Columbia, Canada and headquartered in Dublin, Ireland with a technical team based in Budapest, Hungary.
